How to use the Small Cell License – Public Viewer

Use the Icons on the left side of the viewer to navigate between different menus

- **About** – General information about the Small Cell License – Public Viewer
- **Legend** – Shows the various symbols in the Viewer
    - ***Pending*** – Service Provider has applied to reserve a Small Cell Facility at this street light location (Pole License). The application is under review with City of Fremont Public Works Department.
    - ***Reserved*** – City staff has reviewed and approved this location for Small Cell installation. Service Provider must submit and obtain Encroachment Permits to install Small Cell Facility.
    - ***Active*** – Small Cell Facility has been installed and is operational by the Service Provider at this pole location.
    - ***Relinquished*** – City has reviewed and approved this location for Small Cell Facility. Following the reservation, the Service Provider has failed to obtain Encroachment Permits to install Small Cell Facility within the specified time period of 45 days after reservation. This pole location is now available for other providers if needed.
    - ***Denied*** – City has reviewed and denied an application for Small Cell installation at this location.
- **Layers List** –Turn on or off various layers in the Viewer
- **Filter** – View Small Cell locations based on specified criteria
    - ***License Status*** – Filter small cell facility locations based on status described above.
    - ***Owner*** – Filter small cell facilities based on who owns and installs the equipment on the street light pole on behalf of a service provider.
    - ***Provider*** – Filter small cell facilities based on the service provider who utilizes the equipment installed on the street light pole (typically Verizon, AT&T, T-Mobile, etc.) Please note that the Provider can be the same as the Owner, but the Owner need not always be the Provider.
    - ***Network Type*** – Filter small cell facilities based on the type of wireless network, 5G, 6G, etc.
- **Other Panels** – Contains various map tools, features, and links
    - ***Measurement –*** Measure the distance between points on the map or find the Latitude and Longitude coordinates at a location on the map.
    - ***Near Me –*** Shows Small Cell locations within a specified distance (up to 0.5 miles) from a location on the map.
    - ***Base Map Gallery*** – Choose from a selection of base background maps to be used with the Public Viewer.
    - ***Print*** – Print a map of the location currently shown in the 'Small Cell License – Public Viewer' in specified layout and format. User can specify map scale and toggle labels & legend on or off.
